

WholeSale Finance System (WFS)

Effective FloorPlan Finance Management

The Global End to End Solution for the Leasing and Finance Industry

The Wholesale Finance System is based on the concept of “one asset one loan” to facilitate asset tracking and costing. It automates the management of Floorplan/Bailment business of leasing finance companies. The solution streamlines credit limit, disbursements, billing, settlement, curtailment, stock auditing, and also provides online dealer auditor access to real-time data for round the clock dealer self-service and account management.

Parameter Driven

NetSol WFS is a highly flexible user driven application that can be setup according to user requirements.

Template Driven Loan Schedules

The powerful and flexible Model/Template driven architecture allows financial organizations to set payment, repayment, interest rates, asset tax and miscellaneous charges according to their own requirements, hence reducing the need to re-enter loan details. The system is capable of maintaining any number of pre-defined loan schedules.

Credit Request Management

WFS provides the flexibility to define, monitor and adjust credit limits for different asset categories for each dealer.

Stock Management

System captures and manages the information related to stock movement from the distributor to the dealers, as well as among the dealerships.

Audit Management

WFS maintains an up to date status of goods in stock on the dealer premises. The internal & external auditors or both can perform the audit. The exceptions, as identified by the audits, are captured into the system and the appropriate reports are produced to help analyze dealer behavior.

Billing and Settlement

WFS covers the processing of various types of invoices i.e. daily, monthly and on demand. System is flexible in terms of invoice grace periods and choice of monthly billing day. Settlement processes provide the flexibility to settle receipts both manually and automatically.

DAS - Dealer & Auditor Access System

The wholesale floorplan solution provides internet based real-time access to the full floorplan management database. It handles web-based management of Accounts Payable, Accounts Settlement, Used Asset Financing, and Partner Dealer Inventories for Asset Transfers & Audits. Dealers and auditors can view stocks, check
